

Health education was an integral part of our rural campaign. Towards this initiative we had introduced RAKSHA HEALTH CARE KIT AND GUIDE project wherein we visited rural schools , self help groups, associations etc and tried to teach common ailments of our day to day life how to recognize them ? What first aid has to be given at the very first step ? How and where to send the patient for further management and so on.

Our RAKSHA HEALTH CARE KIT AND GUIDE was inaugurated on Aug 17th 2014 by Rtn Shiva ram of rotary Bangalore , MLA Sudhakar (chickballapur) praised our effort and distributed the kits among few schools. Around 58 schools got the kit and the guide books.

Every quarterly we are planning to do our education programme in a selected locality and distribute the kits and try to educate the rural population about the concerns of health.
